

STAT157 HW 1

Jan 19, 2022

Due Monday, January 24 at 7pm

Logistics Setup

Expected completion time: 12 minutes

Install a time-tracking app as described in the “Predictions” section, and submit a screenshot or photo showing it has been installed.

(TODO: JS denain add instructions on how to get an account on the streamlit app)

Deliberate Practice

Expected completion time: 80 minutes

Go to <https://www.openphilanthropy.org/calibration> and sign in (either create an account or use your Gmail / Facebook account). Click “Home” and complete the following exercises in the app:

- Confidence intervals (level 80%) – at least 30 questions
- 30 questions each from two of the other categories

(Of course, feel free to answer more questions if you would like!)

At the end, go to the “Results” tab and take screenshots showing that you completed at least 30 questions in each category, as well as your calibration performance (the chart that appears below the results).

Predictions

Expected completion time: 25 minutes

Register the following predictions (TODO: JS Denain update with more specific instructions)

- Pick a website, application, or software of your choice. Predict how much time you will spend on it between 12:00am Tuesday January 25th and 11:59pm Sunday January 30th. You should track this **using a time-tracking app** such as Screen Time (if you have macOS Catalina or later), Rescue Time, Digital Wellbeing (Android), or any another tracker you prefer.
- Predict how many people will be in the Zoom lecture at 11:15am on Wednesday, January 26th.

This will resolve based on a count conducted by the course staff.

- Which motion picture will have the maximum domestic gross on the weekend of Jan 28-30?

This will resolve according to Box Office Mojo.

For each question, submit a mean, 80% confidence interval, and an explanation of your reasoning (1-2 paragraphs). For the last two questions, your prediction (but not the explanation) will appear on the public leaderboard. The first question will remain private to you and not count towards the leaderboard.
